SUMMARY

First-year Computer Science student and Smart India Hackathon winner with hands-on experience delivering production e-commerce platforms, component-based web interfaces, and Flask applications. Completed a 2-month industry training programme at a registered software company alongside two independent client deployments — all within the first year of college. Comfortable owning a complete product cycle from client brief to deployment. Seeking a startup internship where I can contribute production-ready code from day one.

TECHNICAL SKILLS

E-Commerce: Shopify Liquid, custom theme architecture, section schemas, variant logic, Theme 2.0, storefront performance tuning

Web Frameworks: Next.js, Flask, component-based architecture, REST API integration, server-side rendering basics

Frontend: HTML5, CSS3, JavaScript (ES6+), responsive layouts, cross-browser compatibility, mobile-first design

Design Tools: Figma, Canva, Adobe XD, Framer — prototyping, design systems, interactive mockups

AI Integration: Gemini AI API, LLM-based text generation, prompt engineering fundamentals, API workflow design

Infrastructure: Git, GitHub, Netlify deployment, VS Code, agile team workflows

EXPERIENCE

Frontend Engineering Trainee | Craxinno Technologies Pvt. Ltd. — Jaipur *Dec 2025 – Jan 2026*

- Completed an intensive 2-month professional training programme covering Next.js component architecture and Shopify theme engineering, certified by a Senior Software Developer.
- Contributed to 2 live client-facing projects within the company, applying production coding standards and collaborative version control practices for the first time in a team setting.
- Recognised by company leadership for outstanding initiative — one of only a small number of trainees to receive a formal commendation during the programme.

Shopify Theme Developer (Freelance) | Visda Organix — Silvassa *2024*

- Sole developer responsible for designing and engineering a full e-commerce storefront for an organic personal care brand, delivering the complete platform in under 3 weeks.
- Authored 6 custom Liquid section templates with schema-driven content controls, enabling the client to manage all page content without developer assistance post-launch.
- Achieved full mobile responsiveness across all pages through a mobile-first build approach, directly improving the brand's reach to its predominantly mobile customer base.

Interface Designer (Freelance) | SAKE Clothing Brand *2023*

- Produced a 12-screen website prototype for a fashion-forward clothing label using Figma, covering all primary user journeys from homepage through to product and checkout flows.
- Delivered a comprehensive design system — including typography scale, colour tokens, and a reusable component library — cutting estimated future design iteration time by over 40%.

PROJECTS

Smart Parking System *HTML5 | CSS3 | JavaScript | Python*

- Engineered a real-time urban parking management platform for Smart India Hackathon, placing 1st in the Web Engineering category against 100+ competing national teams.
- Built complete slot availability logic, geolocation-based lookup, and a fully responsive interface within a 36-hour continuous build sprint.

VibeQA — Automated Testing Platform for AI-Generated Apps (Early Development)

Python | Playwright | LLM APIs

- Architecting an end-to-end quality assurance platform for the growing segment of developers who use AI tools to generate and ship web applications without writing tests.
- Designing a four-stage pipeline — URL crawler, LLM test case generator, Playwright execution engine, and structured failure reporter — before entering the build phase.

EDUCATION

Bachelor of Technology — Computer Science (Data Science)

Manipal University, Jaipur | 2024 – 2028 (Expected)

Core modules: Data Science fundamentals, Algorithms, Database Management, Web Technologies

Certifications and Training

Frontend Engineering Training — Craxinno Technologies (2026)

Artificial Intelligence and Machine Learning — active course (2025–26)

Shopify Liquid Theme Engineering — self-taught, deployed to live clients

ACHIEVEMENTS

Smart India Hackathon — 1st Place

Won the Web Engineering category at the national level, outranking 100+ competing teams. Delivered a complete, functional product within 36 hours.

Sub-Junior AIFF Football — National Representative

Selected to represent Dadra and Nagar Haveli at the national level — demonstrates high performance, discipline, and the ability to execute under competitive pressure.
